

Steps for Bathing a Cavalier King Charles Spaniel

Step 1- Brushing	<ul style="list-style-type: none">● Gently undergo the coat with a slicker brush, starting at your canine's neck and running your way down the body.● Finish by brushing through the hair at the ears and feet.
Step 2- Examine the eyes	<ul style="list-style-type: none">● When your canine looks at you with soulful eyes, it is an excellent time to return the gaze whilst noting anything out of the ordinary.● Look for dilated pupils and dry eyes, and contact your vet to schedule an examination
Step 3- Clean Canine's Ears & Teeth	<ul style="list-style-type: none">● Clean under the ear with a canine ear wipe moistened with witch hazel.● Check the ears at least weekly to come across ear infections or other troubles that may affect your canine's hearing.● Brush your canine's teeth at least 3 times weekly.● You can use a finger glove, canine toothbrush or toothbrush dental chew.● Never use your toothpaste on dogs, as it might include xylitol and other substances that may make your canine fatally ill.
Step 4- Wet your Canine	<ul style="list-style-type: none">● Make sure you are using not-so-hot or cold water.● Keep the temperature average.● Moreover, wet your dog thoroughly.
Step 5- Apply Shampoo	<ul style="list-style-type: none">● Take sufficient shampoo in your palm and gently rub the head first.● You can also dilute the shampoo in a cup of water and apply it to your canine's body.● Make sure that no part is left.
Step 6- Rinse with Water	<ul style="list-style-type: none">● Once you are sure about applying shampoo to every part of your canine's body, it is time to wash it off. Wash your canine thoroughly.
Step 7- Apply conditioner	<ul style="list-style-type: none">● Once the water leaves your canine's coat, apply the conditioner. Avoid applying it on the skin.
